

You're in charge of our "Guess-timating" Jar. Please bring the jar back to school on our next day of school filled with objects of your choice. All the objects must be the same, not a mixture of things. Feel free to fill the jar with something seasonal or something that you have collected. Try to remember what we have already had in the jar so we do not repeat.

Before you bring the jar in, count your objects carefully. It is OK to have someone in your family help you count. **Don't Tell Anyone Else How Many There Are** . . . not even your best friend. The class will estimate how many items are in the jar and then count them together to see who was close to the true number.

Below is a list of suggestions to get you thinking:

The items need to be thumb nail size or larger (no rice!)

jelly beans	pennies	cereal	poker chips
bottle caps	pom pom	beans	erasers
marbles	pebbles	macaroni	bubble gum
cotton balls	beads	spools	gummy treats
crayons	cookies	legos	popped popcorn

Have Fun! We are COUNTING on you!
