

### **Phone message script for schools absentee line**

If you are calling in your child's absence due to flu-like symptoms such as fever, sore throat, cough, headache or muscle aches, please indicate this to the attendance office staff or leave a message noting this on the recording. The school system is working closely with the Broward County Health Department to monitor flu conditions in our schools and this information will continue to assist us in making decisions regarding the best steps to take in keeping our students and schools healthy.
