There are two ways to price stocks in SMG. End-of-Day means this team will get their stock based on the market price at close of day. Real-Time will mean the team will get current stock prices.

This is the Rankings Page. There are two types of rankings lists: Regional and Coordinator. Region may include teams based on grade, geographical region, or a special arrangement with your SMG Coordinator. Coordinator rankings include all SMG teams.

A team must have entered a valid trade before appearing in the Rankings.

Sample Ranking Report. (The Coordinator Rankings show top 100 teams. Region reports show all teams.) Ranking reports may be updated daily or weekly, depending on your division. 2A is the date of this ranking. 2B is the current S&P500 value. 2C is the Total Equity in Portfolio and 2D is the % above/below the S&P500 Growth. Your coordinator may have your teams' ranking based either on *Total Equity*, or *Compared to the S&P500*. (Example: Team AL_8_A117 is performing 6.6427% better than the current S&P500's growth rate.)
