

Name _____

For each of the problems missed on the exam, place the problem's number in the first box, rewrite the problem in the top line, and rework the problem in the space provided. With your solution, also provide EXPLANATIONS about the process, especially in reference to your error. Finally, *BE SURE* to complete your error analysis; that is, discuss the reason for your error and/or describe a specific strategy for the next test. This should address **WHY** you made the error, not "what" your error was.

Problem #	Problem:
Correct Solution	and Explanation Regarding Error
WHY?
