

# Oh No! 99!

## Card Game Directions

Each player receives four cards and the rest of the cards are placed face down in the middle of the players.

Players take turns placing cards face up and calculating the total value of their card and the other cards previously played. For instance, player one plays a 10 card and says "10". Player two plays a 5 card and says, "15". Player three plays an 8 card and says, "23."

After each card is played, it must be replaced with the top card on the face down stack.

Play continues until one or more players are forced to go over 99.

### Card Values and Operations

Aces:	add 1
Jacks:	subtract 10
Queens:	wild cards that can represent any other card in the deck
Kings:	add zero
All others (2-10):	add their face value
