

How to Make Circle Books

Trace and cut out two circles of the same size.

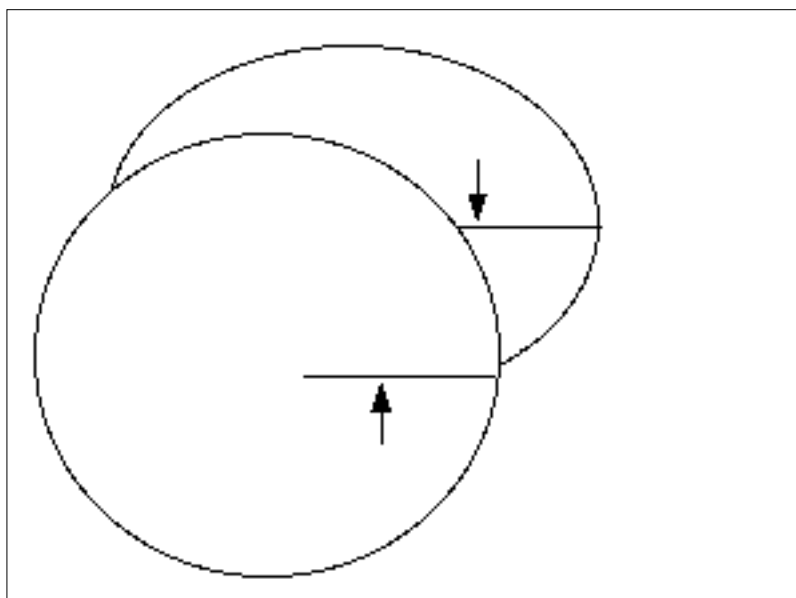

Place the circle on top of each other.

Fold the circles into fourths.

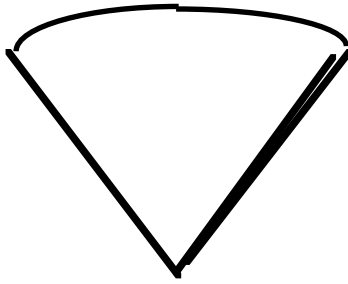

Cut on one of the lines to the center line.

Tape the top circle where you cut to the bottom circle.

This creates a spiral effect. Fold the quarter sections and you end up with a triangular creation.

On the front triangular piece you place a title.

As you unfold each triangle you can place a fact or sentence to create a wacky type of book.

***If you type out the facts on a word processor, you want to divide your page into a four column paper. This will help the sentence strips to be the right size to fit on the triangles when they are cut out.**

Types of Circle Books

All About _____

The Life Cycle of a _____

Oh the Things I Saw on the Way to _____

Circle Book on AppleWorks Draw

1. Select AppleWorks Draw
2. Go Window to Page view
3. Minimize page, so you can see the whole page a one time without having to scroll.
4. Draw a circle
 - *Hold down the shift key while you draw the circle tool. This will help the circle maintain its shape.
5. Use the Line tool to draw perpendicular lines and divide the circle into 4 equal parts.
6. Go to Edit select all.
7. Then go to Format - Group
 - *Now the circle and the lines are grouped together as one object.
8. Go to Format - Document, change Pages Across to 2, leave pages down as 1.
9. Click on the circle one time. Go to Edit copy, then Edit paste.
10. Move the second circle to page two.
11. Use the Text tool to write. Click on the text box to create handles. Go to Arrange - Free Rotate to turn the box so it will fit into the divided section of the circle.
