

## Late Work Grade Reduction

GRADE	1 DAY	2 DAYS	NOTES
10	8	7	These figures represent the MAXIMUM SCORE POSSIBLE on assignments that are 1 DAY or 2+ DAYS LATE!
15	12	11	
20	16	15	
25	21	19	
30	25	22	
35	29	26	GRADE - Total Possible Points.
40	33	30	1 DAY - MAX Possible Points for 1 Day Late
45	37	34	2 DAYS - MAX Possible Points for 2 or more
50	42	38	Days Late

## How To Study

Often we feel if we have spent a lot of time, we have studied hard. Good study is measured by how you study---not how long you study.

In science good study skills require good daily discipline. Following are a few guidelines on “how to study”.

### EACH NIGHT:

1. Review your class notes. If they don't make sense or seem sketchy, research with your text and expand your notes.
2. Do written homework. **\*\*This should be done from what you know and can think in your head, using your book to check your thoughts.\*\*** Anyone can transcribe information--see how much you understand!
3. Preread material to be presented the next day.

### GOOD PRACTICES:

1. Correct any homework that was wrong. It is important to redo it correctly for reinforcement, not just say I see my mistakes.
2. If you cannot correct your homework successfully, come for extra help--then reinforce with a few extra practices on your own.
3. Pay attention in class--THINK as questions are asked. Don't hesitate to ask questions yourself.

### TEST PREPARATION:

- Study chapter summaries / reviews
- Review all vocabulary
- Study class notes / Topic Questions
- Review corrected homeworks / labs

**\*\*with daily study, test preparation should be no more than a quick overall review\*\***

**STUDY IN DAILY DOSES-----IT GOES DOWN EASIER!  
BY THE INCH----A CINCH  
BY THE YARD----IT'S HARD!**

*P.S. Keeping your notebook up to date will enable you to always find material, avoid late grades, do better on quizzes and tests, and gives your final grade a huge boost! **IT'S YOUR GUARANTEE TO PASS!***
