

## Colonial Products

**A.** Use the maps on textbook pages 110, 115, and 120 to locate where the following products and activities could be found in colonial America. Then label them and the colonies on the outline map on the back of this page. (Through shading, the page already identifies the areas where cattle, grain, tobacco, rice, and indigo could be found. You, however, should use symbols or colored markers to show where the products listed below were found. Then include them in the map's key.)
