***TeacherWeb*® Helps Pre-service Teachers Get ‘Schooled’ For Free**

Ridgefield, CT, April, 2006 - *TeacherWeb*®, Inc. the most widely used online source for educator’s websites, recently announced it is expanding its program for pre-service teachers by offering a free e-portfolio.

Many schools of education are now requiring that candidates for an education degree keep an e-portfolio. This generally includes relevant information such as one’s teaching philosophy, future goals, and sample lesson plans. *TeacherWeb*® provides the appropriate template in an easily updatable format free of charge for the duration of the pre-service teacher’s education. After that the website can be maintained for a small fee if desired.

TeacherWeb’s pre-service program presently has over 300 Schools of Education in colleges and universities across the US and Canada. Professors contact *TeacherWeb*® at info@TeacherWeb.com and request free access for their Education majors while they are active student teachers or enrolled in an Educational Technology course as part of their curriculum.

“We cater to full time individual teachers and school districts, and are happy to provide this service for pre-service teachers at no charge. Young teachers are our future customers, as well as the future of education,” explained Jeanne Bodnar, President of *TeacherWeb*. “They have grown up with computers and this is a very familiar form of communication to them. We look forward to expanding this program to many colleges and universities in the coming school year.” Bodnar is confident that as Internet use becomes a core subject in the pre-service teacher’s prospectus, *TeacherWeb*® will become a key tool as well.

TeacherWeb® gives pre-service teachers an edge when applying for jobs, because it demonstrates that they are comfortable with technology and are interested in keeping open the lines of communication between the classroom and the home.

TeacherWeb® has helped teachers extend the classroom beyond the school day since 1996. They provide customizable websites for teachers and schools in an easy-to-use layout for only \$27 a year. Without any prior website design skills, teachers can post homework assignments, grades or announcements, and create worksheets and WebQuests. Teachers also have access to WebQuests posted by other educators as well. A WebQuest is an Internet-based explorative assignment of a specific educational topic presented in a standardized format and shared among teachers and schools. With thousands available for every grade level and classroom subject, *TeacherWeb®* has the largest searchable database for WebQuests on the Internet. Currently over a million students and parents regularly access *TeacherWeb®* for their homework assignments and other relevant classroom information in thousands of schools across the US, Canada, and in American and International schools around the world

About the Company

TeacherWeb® is a registered trademark of TeacherWeb, Inc. a privately-owned Delaware corporation that is the leading provider of non-HTML template websites for teachers' use in the classroom. The ease of use for which TeacherWeb® is known, as well as the great degree of accompanying customization and flexibility and ability to integrate school-wide, is accomplished through a proprietary patent-pending technology which is recognized as unique throughout the industry. TeacherWeb® was launched in 1996 by JeanneBodnar, who is the president, and by a partner in charge of web design who has since retired. It is based in the town of Ridgefield, CT.
