

# How to Make a Book in a Box

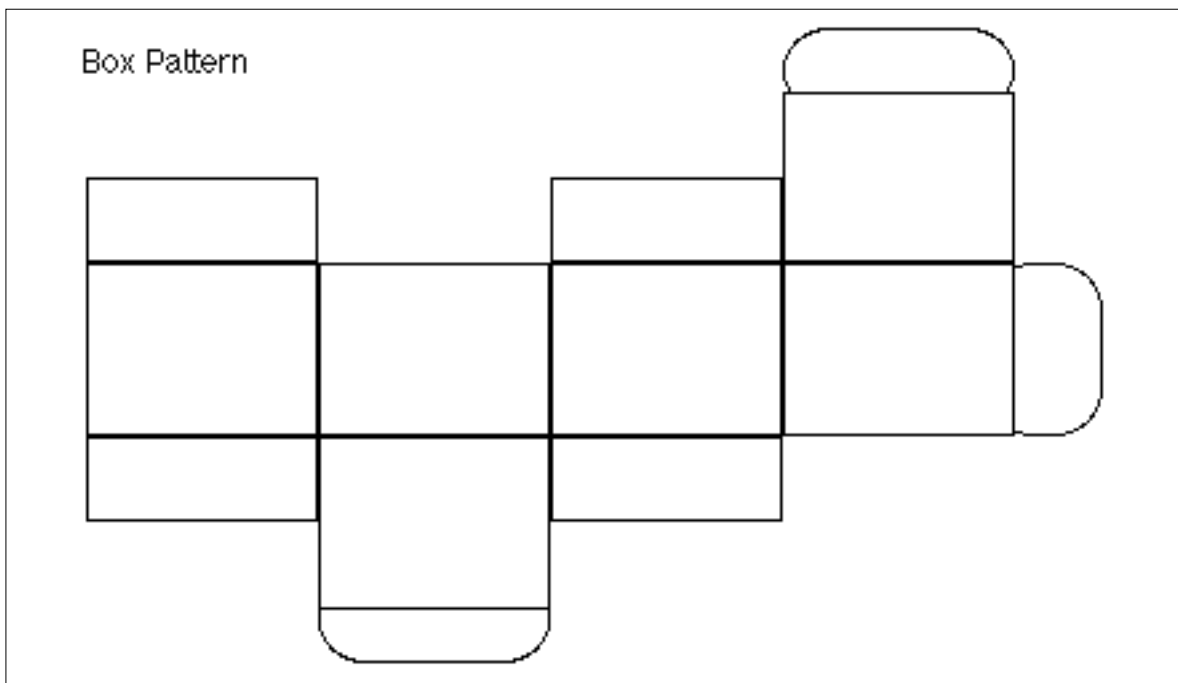

Go to Appleworks - Word Processing.

Write a short story.

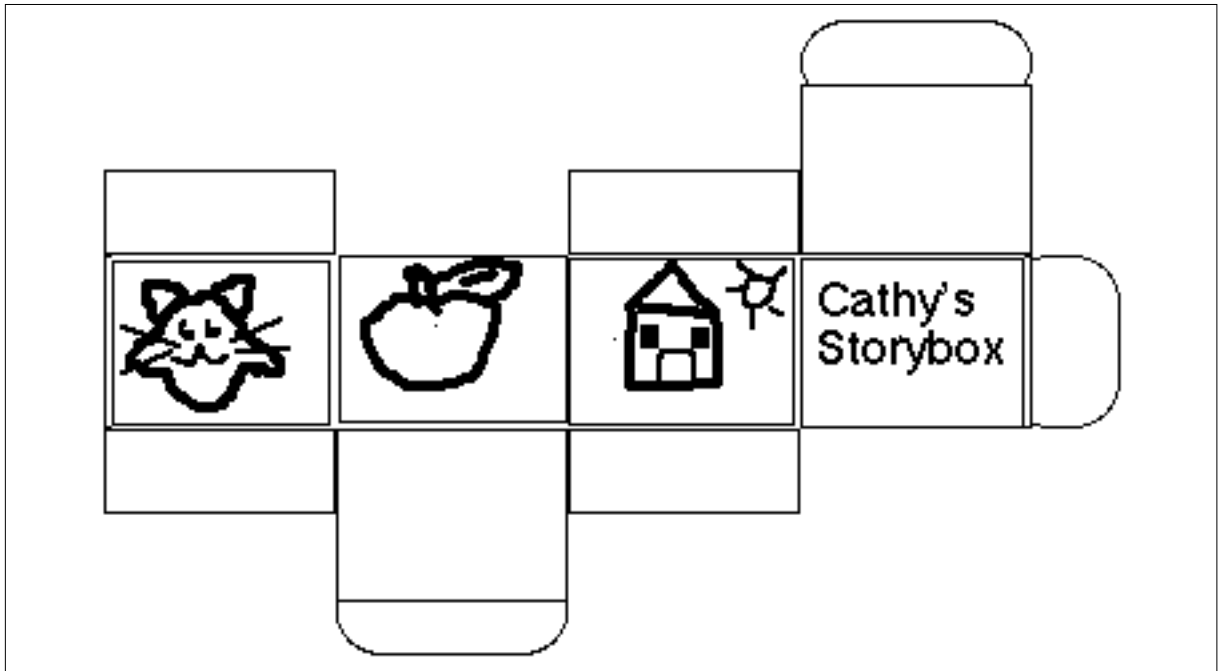

Use the column tool and divide the page into four columns.

**\*Make sure you have the students use Writing Tools to check spelling.**

Next go to Appleworks Draw. Draw a box or use a template made ahead of time.

**You can use the paint tool to decorate the box with drawings or import graphics.**

**Cut the story strips apart. Glue them together. Fold them back and forth like a fan. Glue the bottom of the story in the bottom of the box.**
